WHEREAS, 146 parties (as of May 20, 2017) from around the world have signed on to the Paris Agreement and agreed to work together “to undertake ambitious efforts to combat climate change and adapt to its effects” Paris Agreement; NOW, THEREFORE BE IT **RESOLVED**, that we must adhere to the Paris Agreement; and

RESOLVED, that we will do everything in our power as a state and as a nation to limit the global temperature rise to 1.5 degrees Celsius above pre-industrial levels.

RESTORE THE RENEWABLE ENERGY INCOME TAX CREDIT (CD-04)

WHEREAS, North Carolina has been a powerhouse in developing clean energy sources; and
WHEREAS, North Carolina ranks first in the South and second in the nation in solar energy production; and
WHEREAS, clean energy sources currently employ thousands of North Carolinians and promote economic development while creating fewer environmental problems; and
WHEREAS, the Renewable Energy Tax Credit in North Carolina was not renewed by the Legislature; and
WHEREAS, increasing the use of renewable energy sources will lead to decreased use of fossil fuel and will, therefore, reduce emissions of carbon dioxide, methane, and other air pollutants that harm public health and the environment; and
WHEREAS, the renewable energy tax credit will help to build North Carolina's strong foundation as a solar and wind energy leader;
NOW, THEREFORE BE IT RESOLVED that the North Carolina Democratic Party supports the Renewable Energy Income Tax Credit during the 2017 Session.

FAIR SHARE CONTRIBUTION FOR ELECTRIC VEHICLES (CD-04)

WHEREAS, the NC PEV Task Force has identified the following benefits of driving electric vehicles: fuel cost savings, environmental improvements, energy independence, economic development, and power sustainability.
WHEREAS, North Carolina has over 5300 Electric Vehicles registered as of December 2016.
WHEREAS, Senate Bill 710 is a method to generate tax revenue for road upkeep but results in penalizing motorists for driving electric vehicles by assessing initial and renewal registration fees of \$130;
NOW, THEREFORE BE IT RESOLVED, that the North Carolina Democratic Party support the repeal of Senate Bill 710 Jan 1 2018. A study of assessing a use tax to contribute to road maintenance of 1 cent per mile based on odometer mileage driven since last registration and scaled by vehicle weight shall be performed to determine viability as an equitable replacement for Fair Share road maintenance tax.

RESOLUTION ACKNOWLEDGING THE IMPORTANCE OF SOUND SCIENCE FOR POLICY DECISIONS ABOUT ENERGY, THE ENVIRONMENT AND GLOBAL CLIMATE CHANGE (CD04)

WHEREAS, the Trump Administration has proposed large cuts in the budgets of most of the Federal Agencies that conduct and fund scientific research. The largest of the proposed cuts is a reduction of the budget of the Environmental Protection Agency by 24%, which would substantially weaken the Agency's ability to carry out its core functions and to respond to environmental problems.
WHEREAS, the Trump Administration is taking steps to suppress research and limit communication on scientific topics that it considers politically inconvenient. As Dr. Rush Holt, the president of the American Association for the Advancement of Science (AAAS) puts it, "The concern now is whether policymakers even understand the meaning of evidence. ... If evidence becomes optional, if ideological assertions or beliefs are just as good as scientifically vetted evidence, then [communities'] quality of life suffers."
WHEREAS, EPA Administrator Scott Pruitt has criticized the previous Obama Administration for being "so focused on climate change" and has called for an 'aggressive' agenda of regulatory rollbacks despite (1) the scientific consensus on the amount, causes, and likely catastrophic results of climate change and (2) the extensive evidence that environmental regulation has led to large improvements in air and water quality and food safety public health and has greatly improved quality of life for most people living in the United States.
WHEREAS, multiple studies published in peer-reviewed scientific journals show that 97 percent or more of actively publishing climate scientists agree that climate-warming trends over the past century are extremely likely due to human activities. 2016 was the hottest year on record; 16 of the 17 hottest years ever recorded have occurred since 2000. All major scientific societies and institutions around the world have made very strong statements like that of the American Physical Society in 2007: "The evidence is incontrovertible: Global warming is occurring. If no mitigating actions are taken, significant disruptions in the Earth's physical and ecological systems, social systems, security and human health are likely to occur. We must reduce emissions of greenhouse gases beginning now." Not only is climate change real and measurable, there is very strong evidence that it is accelerating.
WHEREAS, the North Carolina General Assembly has shown disregard for scientific evidence related to the environment and climate change. For example, a law passed by in 2012 the

NC Senate banned the state from basing coastal policies on the most recent scientific predictions of how much sea level will rise, instead restricting all sea-level predictions used to guide state policies to those based on "historical data." As noted by Scientific American, "Less than two weeks after the state's senate passed a climate science-squelching bill, research shows that sea level along the coast between N.C. and Massachusetts is rising faster than anywhere on Earth."

WHEREAS, scientific research has conclusively demonstrated that burning fossil fuels – coal, oil, and natural gas – has serious and long-standing negative impacts on public health, local communities and ecosystems, and the global climate. Electricity production accounts for more than one-third of U.S. greenhouse gas emissions, with coal-fired power plants producing approximately 25 percent of total U.S. greenhouse gas emissions.

WHEREAS, although coal mining is causing irreversible damage to the environment and to public health, and despite the reduced demand for coal in the U.S., regulations on the coal industry continue to be reduced. The U.S. House and Senate voted in February 2017 to repeal the so-called "stream protection rule" that restricted coal companies from dumping mining waste into streams and waterways; this waste kills nearly all life in the streams and waterways, and makes it practically impossible to make the water drinkable. This harm is adding to the impacts of mountaintop removal coal extraction, estimated to have buried nearly 2,000 miles (as of 2010) of Appalachian headwater streams and destroyed 1.4 million acres (as of 2012) of Appalachian forests.

WHEREAS, hydro-fracking does not reduce greenhouse gas emissions and can cause significant air pollution and water contamination unless carefully controlled and regulated. Methane gas released during fracking is a greenhouse gas 25 times more potent than carbon dioxide. Some of the pollutants released by drilling include: benzene, toluene, xylene and ethyl benzene (BTEX), particulate matter and dust, ground level ozone, or smog, nitrogen oxides, carbon monoxide, formaldehyde and metals contained in diesel fuel combustion.

WHEREAS, the true costs of our reliance on fossil fuels is hidden within public and private health expenditures, military budgets, emergency relief funds, and the degradation of sensitive ecosystems that we rely on for critical services.

WHEREAS, renewable energy – wind, solar, geothermal, hydroelectric, and biomass – provides substantial benefits for our climate, our health, and our economy. Most renewable energy sources produce little to no greenhouse gas emissions. Solar power now employs more Americans than oil, coal and natural gas combined. An important catalyst for growth in this rapidly expanding sector is government subsidies for

development of alternative energy sources and consumer acquisition of energy derived from alternative energy sources. **WHEREAS**, more generally, scientific research and associated technological innovation are major drivers of economic expansion and job creation in the United States; and **WHEREAS**, the disregard for science by the Trump Administration and by the NC General Assembly could have catastrophic consequences not just for this country, but for the entire planet. Truth matters; the success or failure of policy initiatives depends on the quality of information used to recognize and define problems, identify significant causal factors, and develop effective solutions that will not create more and worse problems;

NOW THEREFORE BE IT RESOLVED, that the North Carolina Democratic Party states unequivocally that climate change is real, that human activities make a substantive contribution to climate change, and that it is imperative that the United States cooperate fully with the many other countries in the world that are working to limit the harm done by climate change.

RESOLVED, that the North Carolina Democratic Party will demand that North Carolina and the United States as a whole take steps now to reduce reliance on fossil fuels in order to promote energy independence and to meet established goals for reduced greenhouse gas emissions. This includes supporting a rapid and large increase in the percentage of U.S. power needs supplied by alternative energy sources, along with major reductions in the extraction and use of fossil fuels. We will work to provide incentives for the widespread adoption of current alternative energy technologies, and for the continued development of additional alternative energy technological developments.

RESOLVED, that we Democrats strongly support peer-reviewed scientific research and the Federal and State agencies that fund and oversee such research. We will seek to restore full funding to these Federal and State agencies and take steps to ensure that the leadership of these agencies fully support the mission of the agency they lead and will work to enhance the ability of that agency to carry out that mission. We will work with agency personnel and the science community to restore and enhance regulations intended to promote the public good, based on the best available science.

RESOLVED, that we Democrats will demand that those agencies responsible for funding and overseeing scientific research be required to base decisions about what research to conduct and fund based on the merits and potential public benefits of proposed research and not on political criteria. We understand that these agencies must maintain their ability to serve as honest information brokers, able to provide decision makers with trustworthy and verifiable information. We aver

that this information belongs to the American people, not to any one political faction.

BE IT FURTHER **RESOLVED**, that we Democrats recognize the importance of basing decisions on verifiable evidence and on the best available science. We fully acknowledge that verifiable facts exist and that policy decisions must be based on those facts. The concept of “alternative facts” is no more than a smokescreen to justify political maneuvering, and is inherently dangerous to the safety and well-being of the people of North Carolina, the United States of America, and the Earth’s population as a whole.

A RESOLUTION TO ACHIEVE A LITTER FREE NORTH CAROLINA (CD-10 and CD-11)

WHEREAS, litter free roads, streets, highways and byways are an essential asset that needs to be protected; and **WHEREAS**, litter free roads, street, highways and byways enhance the appeal of traveling in North Carolina for residents, travelers, and visitors of our state; and **WHEREAS**, litter can create road hazards which may cause serious damage to vehicles and accidents, injuries and potential death to people traveling on roadways in the state of North Carolina; and **WHEREAS**, litter may create an additional environmental hazard in combination with run-off siphoning into streams, wetlands, and natural areas; and **WHEREAS**, the costs associated with litter removal crews and the potential hazards to those engaged in the pick-up of litter are extremely high; and **WHEREAS**, adequate enforcement and significant fines would offer the potential to significantly reduce the ugly litter that is strewn, and generate revenue from penalties/fines that could be used to enhance and beautify the scenic roadways in North Carolina for all to enjoy; **THEREFORE**, BE IT **RESOLVED**, that the North Carolina Democratic Party include a “Litter Free North Carolina” provision in the Party Platform; and **BE IT FURTHER RESOLVED**, that the North Carolina Democratic Party will work to bring legislation to the North Carolina General Assembly to eliminate litter throughout the State of North Carolina, to establish an educational program to inform the public of the dangers and nuisance of litter, and develop an adequate penalty/fine system to help achieve this goal throughout the State of North Carolina.

A RESOLUTION TO BAN TRANSPORT OF HIGH-LEVEL RADIOACTIVE WASTE THROUGH NORTH CAROLINA (CD-10)

WHEREAS, North Carolina is crisscrossed by interstate highways and rail lines, transporting high-level radioactive waste for the purpose of consolidated storage would unnecessarily increase risks of accidents or terrorism activity, and some of the waste going to Texas or New Mexico would likely travel through North Carolina; **WHEREAS**, these transportation links carry shipments of materials and wastes between nuclear sites, but not currently highly radioactive “spent” nuclear fuel rods or the residues from them; and **WHEREAS**, nuclear waste corporations are targeting Andrews County in Texas and Eddy and Lea Counties in New Mexico for new sites for 40 years or more of storage for the nation’s most dangerous nuclear reactor waste, which could lead to dangerous de facto permanent dumps, and importing high-level radioactive waste would put millions of people at risk for financial and health impacts from potential accidents or incidents; and **WHEREAS**, high-level radioactive waste should remain secured at or near the site of generation and be transported only once, when a scientifically viable permanent isolation site is operational; and **WHEREAS**, high-level radioactive waste consists of irradiated (spent) fuel from nuclear power reactors and/or weapons production that includes uranium, plutonium and other radioactive elements that must be isolated for thousands of years or longer and the waste on a single train car would likely contain as much plutonium as was in the bomb dropped on Nagasaki; and **WHEREAS**, exposure to radioactivity is known to lead to birth defects, genetic damage, and cancers and unshielded exposure to high-level radioactive waste could give a lethal dose; and **WHEREAS**, our lives, land and rivers must be protected from radioactive contamination which could result from accidents, radiation releases or leaks, or terrorist actions during the thousands of high-level radioactive waste shipments that would occur for a period of 24 years if consolidated storage is licensed; and **WHEREAS**, an accident releasing only a small amount of radioactivity could contaminate a 42-square mile area, and a US Department of Energy (“DOE”) study found that cleanup could cost \$620 million in a rural area, and \$9.5 billion in the most heavily contaminated square mile of a large city; and **WHEREAS**, the same DOE plans to ship highly radioactive waste in LIQUID form as well as solid; and

WHEREAS, the DOE has demonstrated its incompetence by pursuing a permanent nuclear waste repository in Nevada instead of disqualifying the site under DOE siting guidelines and the regulations established by other federal agencies and honoring the wishes of the people of that state; **THEREFORE, BE IT RESOLVED**, that the North Carolina Democratic Party does not support or consent to the inter-state transportation of high-level radioactive waste on our railways or highways for the purpose of consolidated storage or permanent disposal of high-level radioactive waste in Texas or New Mexico or to the failed repository proposed for Yucca Mountain in Nevada.

A RESOLUTION TO ADOPT 100% RENEWABLE ENERGY IN NORTH CAROLINA BY 2035 (CD-10)

WHEREAS, the need for energy is essential to maintaining a good quality of life; and **WHEREAS**, the need for clean energy is essential for protecting our air, water, and land resources; and **WHEREAS**, adopting renewable resources are essential to maintaining the economy of the future; and **WHEREAS**, climate change has increased the global average surface temperature by 1.00 degrees Celsius (1.8 degrees Fahrenheit) since 1880; and **WHEREAS**, climate change is expected to increasingly impact North Carolina's temperatures, precipitation and sea level with harmful consequences in coming years; and **WHEREAS**, climate change and global average temperature increases are primarily due to human-caused fossil fuels emissions, including coal, oil and natural gas, according to the United Nations Intergovernmental Panel on Climate Change, National Academy of Science, American Meteorological Society, United States Environmental Protection Agency, United States Department of Defense, and numerous other leading scientific, academic and governmental authorities both in the United States and internationally; and **WHEREAS**, North Carolina installed 1,140 MW of solar electric capacity in 2015, ranking it second nationally; nearly \$17 billion was invested on solar installations in North Carolina, a 159% increase over the previous year; there are currently more than 200 solar companies at work throughout the value chain in North Carolina, employing some 6,000 people; North Carolina ranks third in the nation in installed solar capacity, enough to power 260,000 homes; and solar photovoltaic system prices in the U.S. have dropped by 66% since 2010; and **WHEREAS**, North Carolina has more offshore wind energy potential than any Atlantic state; and

THEREFORE, BE IT RESOLVED, that, to avoid climate catastrophe, to promote job creation and economic growth, and to protect the Earth for current and future generations from climate catastrophe, the North Carolina Democratic Party endorses the State of North Carolina and the United States establishing a transition from a fossil fuel-based economy to one based on 100% clean renewable energy for all energy sectors, by December 31, 2035.

A RESOLUTION CALLING FOR REPEAL S-786, ENERGY MODERNIZATION ACT WHICH ALLOWS FRACKING IN NC (CD-10)

WHEREAS, the North Carolina Democratic Party (“NCDP”) “opposes any and all efforts to implement or expand the dangerous practice of fracking in our state” and supports preservation of the environment and air and water quality control [from 2016 NCDP Platform]; and **WHEREAS**, the legislature in North Carolina has created the Energy Modernization Act S-786 which permits fracking in North Carolina, prevents disclosure of the chemicals used during the fracking process, prevents local governments from using zoning, health and safety regulations to protect citizens from the adverse effects of fracking; and **WHEREAS**, the latest Compendium Of Scientific, Medical, And Media Findings Demonstrating Risks And Harms Of Fracking (November 2016) presents research backed data which scientists assert proves fracking causes air pollution, water contamination, occupational health and safety hazards, radioactive releases, public health effects which include, respiratory, neurological and skin ailments, noise pollution, light pollution, and stress, earthquakes and seismic activity, flood risks, threats to property value and mortgages, risks; **WHEREAS**, the NCDP believes the North Carolina General Assembly should refrain from overreaching in local government decisions; **THEREFORE, BE IT RESOLVED**, that the North Carolina Democratic Party seek legislation to repeal Energy Modernization Act S-786 in its entirety; and **BE IT FURTHER RESOLVED**, that the North Carolina Democratic Party seek legislation to ban fracking in North Carolina.

WHEREAS, The Atlantic Coast Pipeline would pass through lands of indigenous NC tribal communities making its construction a matter of social and environmental justice; and

WHEREAS, the Atlantic Coast Pipeline will cost an estimated \$5 billion, money which could be used to transition towards renewable energy, and which will eventually be paid by captive rate-paying customers of the companies (Duke Energy and Dominion Resources) funding the Atlantic Coast Pipeline; and

WHEREAS, construction of the Atlantic Coast Pipeline will lead to the construction, according to Duke Energy's Integrated Resource Plan, of as many as 19 more gas-fired electricity generating plants by 2030; and

WHEREAS, pipeline construction typically involves eminent domain, which can force land owners to allow burial on their property without their consent, lowering property values and violating basic private property rights; and

WHEREAS, the NC Democratic Party supports development of sustainable energy and a reduction in fossil fuel dependency;

THEREFORE, BE IT RESOLVED, that the North Carolina Democratic Party pursue legislation to prevent construction of the Atlantic Coast Pipeline, and

BE IT FURTHER RESOLVED, that the North Carolina Democratic Party oppose construction of fossil fuel or natural gas pipelines wherever proposed in North Carolina.

Voting and Voting rights

RESOLUTION TO ENACT UNIVERSAL VOTER REGISTRATION IN NORTH CAROLINA (CD06)

WHEREAS, the right to vote is the heart of American democracy, yet in every election hundreds of thousands of North Carolinians are not registered to vote, and
WHEREAS, the other developed democracies have universal voter registration systems with near 90% of voters registered, resulting in a 63% to 90% Western Europe turnout, while in America voter registration is voluntary, much like voting itself, and state and local boards of election register voters resulting in many North Carolinians unregistered, with highly unsatisfactory turnout;

THEREFORE, BE IT RESOLVED that the North Carolina Democratic Party supports the following changes to the voting registration system to accomplish North Carolina universal voter registration:

Use existing government databases to automatically register to vote all U.S. citizens 18 years and older, similar to the new Oregon law which directs its DMV to provide the Secretary of State names of qualified electors to be registered;
 Create a fail-safe policy to ensure voters left off the rolls can register and vote on election day;

Provide every U.S. citizen, upon birth or naturalization, a voter registration number similar to a social security number to be used in all elections and activated when a voter turns 18; Set a voter pre-registration age of 16 years to automatically pre-register youth, tying this policy to a "national voting curriculum" in every high school;

Require U.S. citizens to register to vote when completing taxes or actively opt-out of the process;

Tie Post Office Change of Address forms to the voter registration database; Require state or local governments to send every residence a notice of those registered at that location. Residents may then make changes as needed and return the updated form;

BE IT FURTHER **RESOLVED** that a copy of this resolution be sent to all North Carolina state legislators, the NC Secretary of State, and the Governor.

A RESOLUTION CALLING FOR NONPARTISAN JUDICIAL ELECTIONS (CD-10)

WHEREAS, a 2013 Princeton University political science study found that state supreme court justices who don't face voters are generally more effective than their elected counterparts; and

WHEREAS, partisan elections attempt to further politicize the already problematic process of judicial elections; and

WHEREAS, North Carolina has had good success with its nonpartisan elections for appellate court judges; and

WHEREAS, the recent return to partisan elections for the courts is unnecessary and tends to politicize races which ought to be based on candidates' records and reputation as impartial jurists;

THEREFORE, BE IT **RESOLVED** that the state of North Carolina should return to nonpartisan elections for all North Carolina state appellate courts; and

BE IT FURTHER **RESOLVED** that the North Carolina Democratic Party shall work toward nonpartisan elections for all judicial elections.

WHEREAS, Ending Veteran homelessness is achieved when Veterans are not sleeping in the streets, have access to permanent housing, and when communities can quickly place Veterans in stable housing; and

WHEREAS, scientific study is key to understanding our world, improving our economic future, and resolving issues facing our nation; and

WHEREAS, many politicians seem to feel they are more qualified to define what is scientifically factual, instead of

depending on learned experts to present well-reasoned conclusions from the factual data; and

WHEREAS, not only such politicians doubt the well-reasoned conclusions of these scientists, they threaten their careers, harass them needlessly, act to limit the scientific dialogue by silencing them, and preventing them from publishing; and **WHEREAS**, it is important to maintain, preserve, and encourage a well-reasoned scientific dialogue in the country, and in the world;

WHEREAS, the current administration is acting to silence scientists with views different from their own, contrary to the scientific method. Further, many unqualified individuals are forcing their unqualified views in lieu of the scientific conclusions of experts in the field.

RESOLUTION TO ENSURE THAT THE 2020 CENSUS IS COMPETENTLY AND FAIRLY ADMINISTERED AND ALL RESULTS ARE ACCESSIBLE TO ALL (PROGRESSIVE DEMOCRATS OF NORTH CAROLINA)

WHEREAS, every decade since 1790, as required by the Constitution, the federal government has undertaken a comprehensive census of its people, the accuracy and fairness of which serves the interests of government at every level, provides indispensable information to policy makers and shapers, private businesses and investors, and is a key resource for political parties, academics, journalists, researchers, and citizens, and

as both the Census Bureau’s Director and Deputy Director who left earlier this year have not been replaced; and **WHEREAS**, the Bureau hopes to automate the counting process and introduce online reporting. However, there is no money to test whether this system will work and all field tests scheduled for this year and next year have been cancelled due to the current Administration’s budget cuts, including tests among rural communities which historically are one of the most undercounted populations; and

WHEREAS, there is not enough funding nor any plan to safeguard the online system from hacking or data tampering which may open the door for the disenfranchisement of millions of Americans; and

WHEREAS the current Administration’s decision to use an untested online system and strip sexual orientation from the voluntary 2020 Census Survey questions as well as its aggressive deportation program may result in making rural, LGBTQ, and immigrant populations invisible in the 2020 Census data and therefore underserved for the next ten years.

THEREFORE, BE IT RESOLVED that the Progressive Caucus of the North Carolina Democratic Party urges our Senators and Congressional Delegation to demand sufficient funding for the 2020 Census as well as a bi-partisan effort to test the proposed online system rigorously and safeguard it against any possible hacking or attempts to tamper with data or methodologies, such as cherry-picking some data and suppressing other data for political gain; and **BE IT FURTHER RESOLVED** that the North Carolina Democratic Party offers its full support to our rural, LGBTQ, and immigrant communities which may be negatively affected by the current 2020 Census planning
